What versions can I upgrade from?

Customers can upgrade directly from 5.4.1, 5.5 and 5.5.1

Why should I upgrade to 5.6?

There are a number of good reasons to upgrade to 5.6

1. Since the release of 5.5, Microsoft have retired and released the following products
 - a. SQL 2008 - retired
 - b. SQL 2012 - released
 - c. SQL 2014 - released
 - d. Windows Server 2003 - retired
 - e. Windows Server 2012 released
 - f. Windows 8 / 8.1 released

This version provides support for the all the new products

2. Improved spam detection, while global spam levels have declined slightly, it's still a consideration for most organizations and as such the anti-spam engine has been upgraded.
3. New formats, this new release supports 7Zip and ZipX formats.
4. Fixes, this release contains a number of bug fixes.

Will this release cost me more?

There are no additional charges for these new features as they are included in your support and maintenance package.
